

BUNKERS HILL  
CARE HOME

## VISITING OUR HOME

The Coronavirus pandemic continues to affect all care homes significantly and the situation is changing, on an almost daily basis. In view of this we have decided that it is right that each of our homes is assessed individually on a daily basis in line with the latest guidance from Public Health England. We are therefore asking all relatives to call the home and discuss the restrictions in place at any given time.

At Bunkers Hill, we fully understand the desire to visit loved ones and friends - particularly when for much of the 2020 that was not possible. However, we also have a duty to keep our residents as safe as we possibly can, as well as keeping our staff safe in order that they can look after your loved ones. To achieve this inevitably means minimising contact with our homes and the wider community, wherever possible. We would ask all our families to consider making plans for remote visits to their loved ones over and we will do all we can to facilitate COVID safe visits as soon as is possible and when and where we can. We know how difficult this is for many families, but your support and understanding to date has been amazing – we hope you can understand if we ask you to give it to us over this period.

For more information, please contact the home directly:
